

## Accepted Manuscript

Title: Overview on microfluidic reactors in photocatalysis: applications of graphene derivatives

Authors: Ahmed Yusuf, Corrado Garlisi, Giovanni Palmisano

PII: S0920-5861(18)30641-2  
DOI: <https://doi.org/10.1016/j.cattod.2018.05.041>  
Reference: CATTOD 11471

To appear in: *Catalysis Today*

Received date: 29-11-2017  
Revised date: 19-5-2018  
Accepted date: 21-5-2018

Please cite this article as: Yusuf A, Garlisi C, Palmisano G, Overview on microfluidic reactors in photocatalysis: applications of graphene derivatives, *Catalysis Today* (2018), <https://doi.org/10.1016/j.cattod.2018.05.041>

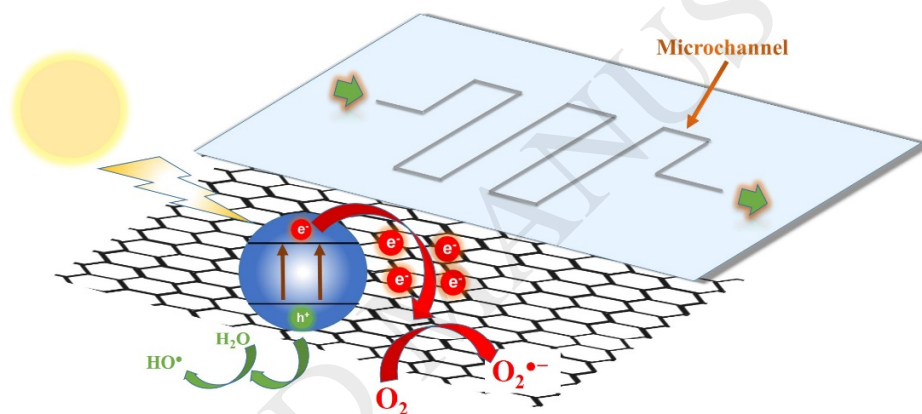

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Overview on microfluidic reactors in photocatalysis: applications of graphene derivatives

Ahmed Yusuf, Corrado Garlisi,\* Giovanni Palmisano

<sup>a</sup>Department of Chemical Engineering, Khalifa University of Science and Technology, Masdar City, P.O. Box 54224, Abu Dhabi, United Arab Emirates. Email: corrado.garlisi@ku.ac.ae; corradogarlisi@hotmail.it

Graphical abstract

Highlights:

- Photocatalytic microreactors offer many advantages compared to traditional reactors
- Few studies have been performed on microreactors using graphene-derived materials
- Graphene-derived photocatalysts may support commercialization of microreactors
- Scaling to larger volumes is still a challenge
