

Contents for Volume 30

Visualization of FC72 confined nucleate boiling	1
J.C. Passos, E.L. da Silva and L.F.B. Possamai	
Numerical and experimental visualization of reverse flow in an inclined isothermal tube	9
T. Maré, I. Voicu and J. Miriel	
Experimental study on rapid solidification process using a novel ultrasound technique	17
F.J. Hong and H.-H. Qiu	
Effects of hydrophobic treatment on thermophysical properties of lightweight mortars	27
A. Frattolillo, G. Giovenco, M.C. Mascolo and A. Vitale	
Air–water and momentum exchanges in unsteady surging waters: An experimental study	37
H. Chanson	
A look at three measurement techniques for bubble size determination	49
A. Vazquez, R.M. Sanchez, E. Salinas-Rodríguez, A. Soria and R. Manasseh	
Vapor quality and performance of an automotive air conditioning system	59
S. Wang, J. Gu, T. Dickson, J. Dexter and I. McGregor	
Two-phase pressure drop in a horizontal thin annulus: Effects of channel vibration and wall gas injection	67
C.M. Dillon, S.M. Ghiaasiaan, S.I. Abdel-Khalik, S.M. Jeter and D.L. Sadowski	
Author Index for Volume 29	I
Subject Index for Volume 29	III
Contents for Volume 29	VI
Thermo- and fluid dynamics characterization of spray cooling with pulsed sprays	79
M.R.O. Panão and A.L.N. Moreira	
Experimental assessment of emission models used for IC engine exhaust noise prediction	97
A.J. Torregrosa, A. Broatch, V. Bermúdez and I. Andrés	
Experimental investigations on transport properties of magnetic fluids	109
Q. Li, Y. Xuan and J. Wang	
Measurements of droplets characteristics in a swirl-stabilized spray flame	117
R. Hedef and B. Lenze	
Hydrodynamic tests on a fixed plate in uniform flow	131
K. Klaka, J.D. Penrose, R.R. Horsley and M.R. Renilson	
The behavior of the skin-friction coefficient of a turbulent boundary layer flow over a flat plate with differently configured transverse square grooves	141
R. Wahidi, W. Chakroun and S. Al-Fahed	
A fast-response thin film thermocouple to measure rapid surface temperature changes	153
Y. Heichal, S. Chandra and E. Bordatchev	
Turbulent mixing enhancement with a 20° chute mixer	161
M.R. Ahmed and S.D. Sharma	
Entrainment of refrigerated air curtains down a wall	175
B.S. Field and E. Loth	

The pool boiling heat transfer enhancement from experiments with binary mixtures and porous heating covers	185
E. Meléndez and R. Reyes	
Experimental and numerical study of the hydraulic jump of an impinging jet on a moving surface	193
M. Gradeck, A. Kouachi, A. Dani, D. Arnoult and J.L. Boréan	
Application of stereoscopic tracking velocimetry for experimental and numerical investigation of directional solidification	203
D.J. Lee, S.S. Cha and N. Ramachandran	
Refrigerant pressure drop in chevron and bumpy style flat plate heat exchangers	213
E.W. Jassim, T.A. Newell and J.C. Chato	
Boiling of ammonia/lubricant mixture on a horizontal tube in a flooded evaporator with inlet vapor quality	223
J.X. Zheng, G.P. Jin, M.-C. Chyu and Z.H. Ayub	
An experimental determination of pressure drops in the flow of low density spherical capsule train inside horizontal pipes	233
D. Ulusarslan and I. Teke	
Natural convection of liquid metal under a uniform magnetic field with an electric current supplied from outside	243
M. Kaneda, T. Tagawa and H. Ozoe	
Refrigerant 134a liquid flow through micro-scale short tube orifices with/without phase change	253
X. Tu, P.S. Hrnjak and C.W. Bullard	
Heat transfer enhancement in pool boiling of a refrigerant fluid with wire nets structures	263
A. Franco, E.M. Latrofa and V.V. Yagov	
A device and technique to measure the heat transfer limit of a planar heat pipe wick	277
R.R. Williams and D.K. Harris	
 Investigation of a combustion driven oscillation in a refinery flare. Part A: Full scale assessment	 285
G.J. Nathan, P.J. Mullinger, D. Bridger and B. Martin	
Micro-jets in confined turbulent cross flow	297
J.B. Kelman, D.A. Greenhalgh and M. Whiteman	
Computational and experimental investigation of the drag reduction and the components of pressure drop in horizontal slug flow using liquids of different viscosities	307
M. Daas and D. Bley	
Determination of heat transfer and friction characteristics of an adapted inclined louvered fin	319
C. T'Joene, H.-J. Steeman, A. Willockx and M. De Paepe	
Measurement and correlation of friction characteristic of flow through foam matrixes	329
J.F. Liu, W.T. Wu, W.C. Chiu and W.H. Hsieh	
A correlation for predicting the kerf profile from abrasive water jet cutting	337
C. Ma and R.T. Deam	
Flow pattern, pressure drop and void fraction of two-phase gas–liquid flow in an inclined narrow annular channel	345
S. Wongwises and M. Pipattanakul	
Experimental determination of preferred instability modes in a mechanically excited thermal plume by ultrasound scattering	355
J.C. Elicer-Cortés, A. Navia, D. Boyer, M. Pavageau and R.H. Hernández	
An experimental investigation regarding the laminar to turbulent flow transition in helically coiled pipes	367
A. Cioncolini and L. Santini	
An experimental IR thermographic method for the evaluation of the heat transfer coefficient of liquid-cooled short pin fins arranged in line	381
R. Ricci and S. Montelpare	
Combined/simultaneous gust and oscillating turbine row unsteady aerodynamics in subsonic flow	393
A. Beretta, F. Rottmeier and P. Ott	
Pressure gradient calculation for air–water heterogeneous mixture flow in a small square horizontal channel based on the in situ parameters and flow pattern coefficient	403
J.K. Keska and G. Wang	
 Two-stage ejector based pressure recovery system for small scale SCOIL	 415
G. Singhal, R. Rajesh, Mainuddin, R.K. Tyagi, A.L. Dawar, P.M.V. Subbarao and M. Endo	
Experimental and numerical analyses to enhance the performance of a microturbine diffuser	427
E. Benini, A. Toffolo and A. Lazaretto	
Nucleation characteristics and stability considerations during flow boiling in microchannels	441
S.G. Kandlikar
