

## Accepted Manuscript

Title: Evaluation of different immobilized lipases in transesterification reactions using tributyrin: Advantages of the heterofunctional octyl agarose beads

Author: Daniela B. Hirata Tiago L. Albuquerque Nazzoly  
Rueda Jose J. Virgen-Ortíz Veymar G. Tacias-Pascacio  
Roberto Fernandez-Lafuente

PII: S1381-1177(16)30152-7  
DOI: <http://dx.doi.org/doi:10.1016/j.molcatb.2016.08.008>  
Reference: MOLCAB 3414

To appear in: *Journal of Molecular Catalysis B: Enzymatic*

Received date: 1-6-2016  
Revised date: 1-8-2016  
Accepted date: 10-8-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Evaluation of different immobilized lipases in transesterification reactions using tributyrin:

### Advantages of the heterofunctional octyl agarose beads.
