Evidence for a strong polarization of n-hexane in zeolite H-ZSM-5 by FT-IR and solid-state NMR spectroscopy

Mariusz Gackowski, Jerzy Podobiński, Michael Hunger

PII: S1387-1811(18)30364-0

DOI: [10.1016/j.micromeso.2018.06.054](https://doi.org/10.1016/j.micromeso.2018.06.054)

Reference: MICMAT 9007

To appear in: *Microporous and Mesoporous Materials*

Received Date: 24 May 2018

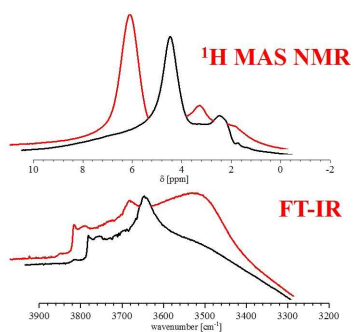

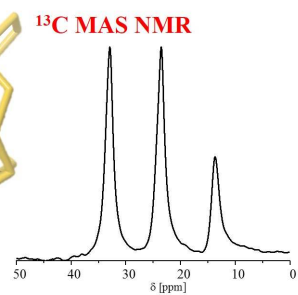

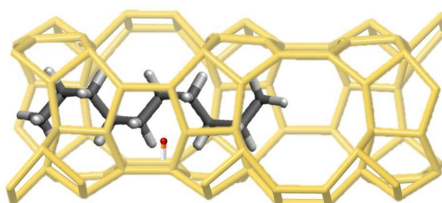

Revised Date: 15 June 2018

Accepted Date: 28 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
