

# Accepted Manuscript

A combined strategy of acid-assisted polymerization and solid state activation to synthesize functionalized nanoporous activated biocarbons from biomass for CO<sub>2</sub> capture

Gurwinder Singh, Kripal S. Lakhi, Kavitha Ramadass, Sungho Kim, Declan Stockdale, Ajayan Vinu

PII: S1387-1811(18)30294-4

DOI: [10.1016/j.micromeso.2018.05.035](https://doi.org/10.1016/j.micromeso.2018.05.035)

Reference: MICMAT 8937

To appear in: *Microporous and Mesoporous Materials*

Received Date: 9 March 2018

Revised Date: 8 May 2018

Accepted Date: 25 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
