Facile synthesis of Sn-containing MFI zeolites as versatile solid acid catalysts

Enhui Yuan, Weili Dai, Guangjun Wu, Naijia Guan, Michael Hunger, Landong Li

PII: S1387-1811(18)30285-3

DOI: [10.1016/j.micromeso.2018.05.032](https://doi.org/10.1016/j.micromeso.2018.05.032)

Reference: MICMAT 8934

To appear in: *Microporous and Mesoporous Materials*

Received Date: 26 March 2018

Revised Date: 11 May 2018

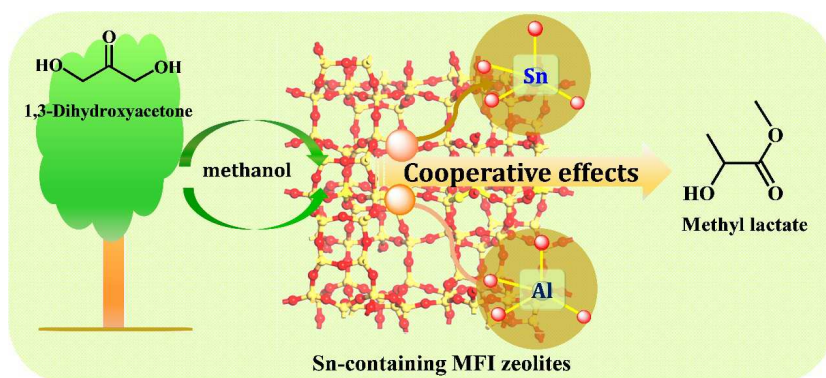

Accepted Date: 21 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Sn-containing MFI zeolites with controllable Al contents were prepared with EDTA-Sn complexes. The combination effect of the Lewis acid sites and Brønsted acid sites in DHA to ML conversion was achieved over Sn-Al-MFI zeolites.
