Direct synthesis of mesoporous nitrogen doped Ru-carbon catalysts with semi-embedded Ru nanoparticles for acetylene hydrochlorination

Guojun Lan, Yong Yang, Xiaolong Wang, Wenfeng Han, Haodong Tang, Huazhang Liu, Ying Li

PII: S1387-1811(18)30039-8

DOI: [10.1016/j.micromeso.2018.01.024](https://doi.org/10.1016/j.micromeso.2018.01.024)

Reference: MICMAT 8749

To appear in: *Microporous and Mesoporous Materials*

Received Date: 2 October 2017

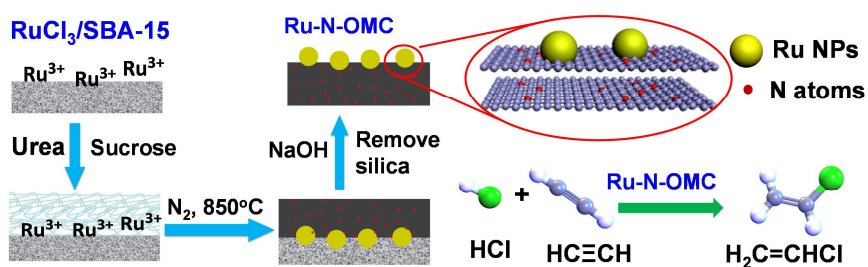

Revised Date: 2 January 2018

Accepted Date: 16 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TOC:

N and Ru NPs were doped in the mesoporous carbon framework via a one-step carbonization method, which shows high activity and stability in the acetylene hydrochlorination.
