Cation exchange modification of clinoptilolite –screening analysis for potential equilibrium and kinetic adsorption separations involving methane, nitrogen, and carbon dioxide

D.A. Kennedy, F.H. Tezel

PII: S1387-1811(17)30775-8

DOI: [10.1016/j.micromeso.2017.11.054](https://doi.org/10.1016/j.micromeso.2017.11.054)

Reference: MICMAT 8689

To appear in: *Microporous and Mesoporous Materials*

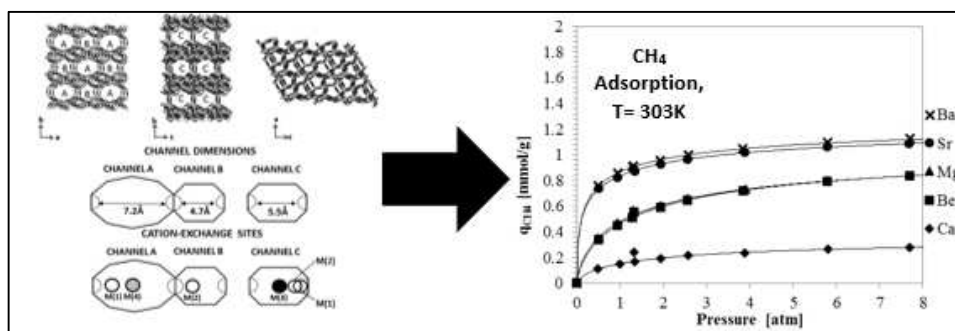

Received Date: 20 July 2017

Revised Date: 14 October 2017

Accepted Date: 30 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
