## **Accepted Manuscript**

Highly selective and sensitive metal-organic framework fluorescent probe for Cu<sup>2+</sup> through rational design of binding sites

Xudong Zhao, Dahuan Liu, Hongliang Huang, Chongli Zhong

PII: \$1387-1811(15)00649-6

DOI: 10.1016/j.micromeso.2015.11.042

Reference: MICMAT 7428

To appear in: Microporous and Mesoporous Materials

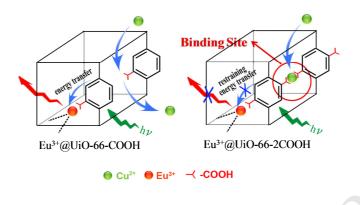

Received Date: 19 September 2015 Revised Date: 19 November 2015 Accepted Date: 24 November 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
