

Accepted Manuscript

Title: Climate driven trends in tree biomass increment show asynchronous dependence on tree-ring width and wood density variation

Authors: Astrid Vannoppen, Pascal Boeckx, Tom De Mil, Vincent Kint, Quentin Ponette, Jan Van den Bulcke, Kris Verheyen, Bart Muys

PII: S1125-7865(17)30139-X
DOI: <https://doi.org/10.1016/j.dendro.2018.02.001>
Reference: DENDRO 25492

To appear in:

Received date: 15-9-2017
Revised date: 25-1-2018
Accepted date: 7-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Article type: Original research articles

Climate driven trends in tree biomass increment show asynchronous dependence on tree-ring width and wood density variation
