

Accepted Manuscript

Formation and identification of novel derivatives of primary amine and zwitterionic drugs

Jordan Ash, Logan Hickey, John Goodpaster

PII: S2468-1709(18)30039-0
DOI: <https://doi.org/10.1016/j.forc.2018.07.004>
Reference: FORC 113

To appear in: *Forensic Chemistry*

Received Date: 6 April 2018
Revised Date: 3 May 2018
Accepted Date: 25 July 2018

Please cite this article as: J. Ash, L. Hickey, J. Goodpaster, Formation and identification of novel derivatives of primary amine and zwitterionic drugs, *Forensic Chemistry* (2018), doi: <https://doi.org/10.1016/j.forc.2018.07.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

FORMATION AND IDENTIFICATION OF NOVEL DERIVATIVES OF PRIMARY AMINE AND ZWITTERIONIC DRUGS

Jordan Ash, Logan Hickey and John Goodpaster*

Forensic and Investigative Sciences Program

Indiana University – Purdue University Indianapolis (IUPUI)

402 North Blackford Street, LD 326

Indianapolis, IN 46202

KEY WORDS: forensic science, drugs of abuse, controlled substances, gas chromatography, mass spectrometry, derivatives, derivatization, gabapentin, lorazepam, vigabatrin, pregabalin, clorazepate, amphetamine, 2C-I
