This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Application of hyperspectral imaging and Machine Learning methods for the detection of gunshot residue patterns

Acknowledgements

This research was supported by The Polish National Centre for Research and Development grant: ‘Development of system solutions supporting the analysis of crime and accident scenes on the basis of the data acquired by laser scanning and satellite measurement techniques’, project no. DOB-BIO6/18/102/2014.

The authors would like to thank the anonymous reviewers for their helpful and constructive comments that contributed to improving the final version of the paper.
