This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Pediatric constrictive asphyxia a rare form of child abuse:

A report of two cases

Highlights:

- Constrictive asphyxia, is a relatively uncommon form of fatal child abuse.
- Constrictive asphyxia can also occur by sitting on a child who is lying on a bed.
- Constrictive asphyxia is a possible cause of rib fractures in infants.
