This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Analysis of illicit drugs in wastewater – The approach from the perspective of law enforcement

Highlights

- Wastewater-based epidemiology is increasingly used to monitor illicit drug use
- Use of gathered data for law enforcement has barely been contemplated
- Interpret results from the perspective of law enforcement intelligence
- Valuable information to guide strategic and operational decisions
