This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

- FSTT data obtained from imaging may not facilitate recognition and establish acceptable level of resemblance.
- The sex of assessors does not influence the recognition process.
- Knowledge on Human Anatomy and Forensic Dentistry has no effect on recognition.
- A combined data of FSTT datasets for Brazilians is proposed.
