Title: Influence of thermal hair straightening on cannabis and cocaine content in hair

Author: Jana Ettliger Michel Yegles

PII: S0379-0738(16)00008-6
DOI: <http://dx.doi.org/doi:10.1016/j.forsciint.2016.01.002>
Reference: FSI 8268

To appear in: *FSI*

Received date: 9-10-2015
Revised date: 24-12-2015
Accepted date: 2-1-2016

Please cite this article as: J. Ettliger, M. Yegles, Influence of thermal hair straightening on cannabis and cocaine content in hair, *Forensic Science International* (2016), <http://dx.doi.org/10.1016/j.forsciint.2016.01.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Thermal hair straightening has a strong impact on THC and cocaine contents in hair
- Heat treatment of hair at 200°C converts cocaine into BZE and THC into CBN
- Thermal straightening should be considered for hair results interpretation
