Title: Levamisole-adulterated cocaine: Two fatal case reports and evaluation of possible cocaine toxicity potentiation

Author: Francesca Indorato Guido Romano Nunziata Barbera

PII: S0379-0738(16)00013-X  
DOI: <http://dx.doi.org/doi:10.1016/j.forsciint.2016.01.005>  
Reference: FSI 8273

To appear in: *FSI*

Received date: 25-9-2015  
Revised date: 30-12-2015  
Accepted date: 2-1-2016

Please cite this article as: F. Indorato, G. Romano, N. Barbera, Levamisole-adulterated cocaine: two fatal case reports and evaluation of possible cocaine toxicity potentiation, *Forensic Science International* (2016), <http://dx.doi.org/10.1016/j.forsciint.2016.01.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

1. Levamisole has been identified as a cocaine adulterant since 2002.
2. We present the *post-mortem* levamisole concentrations of two cocaine users.
3. This article is an alert on the risk of using levamisole-adulterated cocaine.
4. We incentive to public new researches involving levamisole and cocaine.
