This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

Changes in cocaine impurity profiles under different storage conditions are examined

Alkaloid profiles change over time and are susceptible to sample purity and elevated temperatures

Residual solvent profiles are not affected by any of the examined experimental conditions
