This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

A review of Medline literature on bile analysis in forensic toxicology is proposed.

273 references including 214 case reports are reviewed.

Key points of bile physiology and technical aspects of bile analysis are reported.

Qualitative and quantitative interpretation of bile analysis is discussed.
