This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The presented case shows the importance of supplementary autopsy techniques.
- In SUDI cases both the mode and the manner of death are important factors
- Low virulence viruses should also be considered in child deaths.
