Title: Old meets New: Comparative examination of conventional and innovative RNA-based methods for body fluid identification of laundered seminal fluid stains after modular extraction of DNA and RNA

Authors: G. Kulstein, U. Schacker, P. Wiegand

PII: S1872-4973(18)30043-7
DOI: <https://doi.org/10.1016/j.fsigen.2018.06.017>
Reference: FSIGEN 1915

To appear in: *Forensic Science International: Genetics*

Received date: 25-1-2018
Revised date: 5-6-2018
Accepted date: 26-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Old meets New: Comparative examination of conventional and innovative RNA-based methods for body fluid identification of laundered seminal fluid stains after modular extraction of DNA and RNA

Graphical abstract

Highlights

- Successive DNA and RNA extraction feasible for downstream analysis of laundered semen stains
- Successful detection of seminal fluid after laundering with RSID and Hy-Liter
