

## Accepted Manuscript

Catalytic activity of different iron oxides: Insight from pollutant degradation and hydroxyl radical formation in heterogeneous Fenton-like systems

Ling Zhao, Zhi-Rong Lin, Xiao-hong Ma, Yuan-Hua Dong

PII: S1385-8947(18)31268-3  
DOI: <https://doi.org/10.1016/j.cej.2018.07.035>  
Reference: CEJ 19433

To appear in: *Chemical Engineering Journal*

Received Date: 25 November 2017  
Revised Date: 2 July 2018  
Accepted Date: 4 July 2018

Please cite this article as: L. Zhao, Z-R. Lin, X-h. Ma, Y-H. Dong, Catalytic activity of different iron oxides: Insight from pollutant degradation and hydroxyl radical formation in heterogeneous Fenton-like systems, *Chemical Engineering Journal* (2018), doi: <https://doi.org/10.1016/j.cej.2018.07.035>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running header: Catalytic activity of different iron oxides: Insight from pollutant degradation and hydroxyl radical formation in heterogeneous Fenton-like systems

Total Words: 7044 words

Text (including abstract): 6005 words

References: 1039 words
