Solar light driven degradation of norfloxacin using as-synthesized Bi³⁺ and Fe²⁺ co-doped ZnO with the addition of HSO₅⁻: Toxicities and degradation pathways investigation

Noor S. Shah, Javed Ali Khan, Murtaza Sayed, Zia Ul Haq Khan, Allah Ditta Rizwan, Nawshad Muhammad, Grzegorz Boczkaj, Behzad Murtaza, Muhammad Imran, Hasan M. Khan, Gohar Zaman

PII: S1385-8947(18)31149-5
DOI: <https://doi.org/10.1016/j.cej.2018.06.111>
Reference: CEJ 19322

To appear in: *Chemical Engineering Journal*

Received Date: 26 March 2018
Revised Date: 5 June 2018
Accepted Date: 18 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Solar light driven degradation of norfloxacin using as-synthesized Bi³⁺ and Fe²⁺ co-doped ZnO with the addition of HSO₅⁻: Toxicities and degradation pathways investigation
