Electrochemical mineralization of sulfamethoxazole over wide pH range using $\text{Fe}^{\text{II}}\text{Fe}^{\text{III}}$ LDH modified carbon felt cathode: Degradation pathway, toxicity and reusability of the modified cathode

Soliu O. Ganiyu, Thi Xuan Huong Le, Mikhael Bechelany, Nihal Oturan, Stefano Papirio, Giovanni Esposito, Eric van Hullebusch, Marc Cretin, Mehmet A. Oturan

PII: S1385-8947(18)30714-9
DOI: <https://doi.org/10.1016/j.cej.2018.04.141>
Reference: CEJ 18941

To appear in: *Chemical Engineering Journal*

Received Date: 12 February 2018
Revised Date: 19 April 2018
Accepted Date: 20 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
