Experimental and mathematical characterisation of the rheological instability of concentrated waste activated sludge subject to anaerobic digestion

Peng Wei, Qiuman Tan, Wim Uijttewaal, Jules B. van Lier, Merle de Kreuk

PII: S1385-8947(18)30681-8
DOI: <https://doi.org/10.1016/j.cej.2018.04.108>
Reference: CEJ 18908

To appear in: *Chemical Engineering Journal*

Received Date: 10 February 2018
Revised Date: 13 April 2018
Accepted Date: 17 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Declarations of interest: none.

Experimental and mathematical characterisation of the rheological instability of concentrated waste activated sludge subject to anaerobic digestion

Peng Wei ^{a,*}, Qiuman Tan ^a, Wim Uijttewaal ^b, Jules B. van Lier ^a and Merle de Kreuk ^a
