CO₂ activation by methane in a dual-bed configuration via methane cracking and iron oxide lattice oxygen transport – concept and materials development

Martin Keller, Yoshio Matsuzaki, Junichiro Otomo

PII: S1385-8947(18)30876-3
DOI: <https://doi.org/10.1016/j.cej.2018.05.069>
Reference: CEJ 19085

To appear in: *Chemical Engineering Journal*

Received Date: 5 February 2018
Revised Date: 9 May 2018
Accepted Date: 10 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

CO₂ activation by methane in a dual-bed configuration via methane cracking and iron oxide lattice oxygen transport – concept and materials development
