Crosslinked poly(ionic liquid) anchored with organic probe as a new promising platform for organic solvent-free recognition, quantification, and selective removal of heavy metal ion

Ce–Ce Hu, Qiang Gao, Shu Liu, Li–Li Chang, Kai–Sheng Xia, Bo Han, Cheng–Gang Zhou

PII: S1385-8947(18)30543-6
DOI: <https://doi.org/10.1016/j.cej.2018.03.185>
Reference: CEJ 18792

To appear in: *Chemical Engineering Journal*

Received Date: 2 February 2018
Revised Date: 26 March 2018
Accepted Date: 30 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Crosslinked poly(ionic liquid) anchored with organic probe as a new promising platform for organic solvent-free recognition, quantification, and selective removal of heavy metal ion
