High efficiency extraction of U(VI) from seawater by incorporation of polyethyleneimine, polyacrylic acid hydrogel and Luffa cylindrical fibers

Shouzheng Su, Rongrong Chen, Qi Liu, Jingyuan Liu, Hongsen Zhang, Rumin Li, Milin Zhang, Peili Liu, Jun Wang

PII: S1385-8947(18)30522-9
DOI: <https://doi.org/10.1016/j.cej.2018.03.164>
Reference: CEJ 18771

To appear in: *Chemical Engineering Journal*

Received Date: 14 January 2018
Revised Date: 26 March 2018
Accepted Date: 28 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
