A novel symbiotic system combining algae and sludge membrane bioreactor technology for wastewater treatment and membrane fouling mitigation: Performance and Mechanism

Li Sun, Yu Tian, Jun Zhang, Hao Cui, Wei Zuo, Jianzheng Li

PII: S1385-8947(18)30448-0
DOI: <https://doi.org/10.1016/j.cej.2018.03.090>
Reference: CEJ 18697

To appear in: *Chemical Engineering Journal*

Received Date: 11 January 2018
Revised Date: 16 March 2018
Accepted Date: 17 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A novel symbiotic system combining algae and sludge membrane bioreactor
technology for wastewater treatment and membrane fouling mitigation:**

Performance and Mechanism
