Novel composite gel beads for the immobilization of ammonia-oxidizing bacteria: Fabrication, characterization, and biokinetic analysis

Ryo Aoyagi, Ryuichi Sato, Akihiko Terada, Hideaki Tokuyama

PII: S1385-8947(18)30300-0
DOI: <https://doi.org/10.1016/j.cej.2018.02.087>
Reference: CEJ 18566

To appear in: *Chemical Engineering Journal*

Received Date: 2 December 2017
Revised Date: 2 February 2018
Accepted Date: 20 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Novel composite gel beads for the immobilization of ammonia-oxidizing bacteria:**Fabrication, characterization, and biokinetic analysis**

Ryo Aoyagi, Ryuichi Sato, Akihiko Terada**, Hideaki Tokuyama*
