Dual redox/pH-responsive hybrid polymer-lipid composites: synthesis, preparation, characterization and application in drug delivery with enhanced therapeutic efficacy

Juan Li, Yuan Jun Ma, Yan Wang, Bo Zhi Chen, Xin Dong Guo, Can Yang Zhang

PII: S1385-8947(18)30250-X
DOI: <https://doi.org/10.1016/j.cej.2018.02.055>
Reference: CEJ 18534

To appear in: *Chemical Engineering Journal*

Received Date: 15 November 2017
Revised Date: 25 January 2018
Accepted Date: 11 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dual redox/pH-responsive hybrid polymer-lipid composites: synthesis, preparation, characterization and application in drug delivery with enhanced therapeutic efficacy
