Coaggregation mechanism of pyridine-degrading strains for the acceleration of the aerobic granulation process

Ji Liang, Wang Li, Hongling Zhang, Xinbai Jiang, Lianjun Wang, Xiaodong Liu, Jinyou Shen

PII: S1385-8947(18)30030-5
DOI: <https://doi.org/10.1016/j.cej.2018.01.029>
Reference: CEJ 18349

To appear in: *Chemical Engineering Journal*

Received Date: 25 October 2017
Revised Date: 4 January 2018
Accepted Date: 4 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Coaggregation mechanism of pyridine-degrading strains for the acceleration of the
aerobic granulation process
