Mathematical modeling on the nitrogen removal inside the membrane-aerated biofilm dominated by ammonia-oxidizing archaea (AOA): Effects of temperature, aeration pressure and COD/N ratio

Mei Li, Chunyu Du, Jun Liu, Xiao Quan, Meichao Lan, Baoan Li

PII: S1385-8947(18)30040-8
DOI: <https://doi.org/10.1016/j.cej.2018.01.040>
Reference: CEJ 18360

To appear in: *Chemical Engineering Journal*

Received Date: 5 November 2017
Revised Date: 5 January 2018
Accepted Date: 7 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
