Short communication

Pseudocapacitive material with 928 mAh cm⁻³ particle-level volumetric specific capacity enabled by continuous phase-transition

Xiang Ge, Changdong Gu, Zhujun Yao, Jie Sun, Xiuli Wang, Jiangping Tu

PII: S1385-8947(18)30001-9
DOI: <https://doi.org/10.1016/j.cej.2018.01.001>
Reference: CEJ 18321

To appear in: *Chemical Engineering Journal*

Received Date: 28 October 2017
Revised Date: 12 December 2017
Accepted Date: 2 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Pseudocapacitive material with 928 mAh cm⁻³ particle-level volumetric specific capacity enabled by continuous phase-transition
