

## Accepted Manuscript

An efficient composite ion exchanger of silica matrix impregnated with ammonium molybdophosphate for cesium uptake from aqueous solution

Hao Deng, Yuxiang Li, Yi Huang, Xue Ma, Lang Wu, Taohua Cheng

PII: S1385-8947(15)01451-5  
DOI: <http://dx.doi.org/10.1016/j.cej.2015.10.040>  
Reference: CEJ 14316

To appear in: *Chemical Engineering Journal*

Received Date: 26 August 2015  
Revised Date: 18 October 2015  
Accepted Date: 19 October 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**An efficient composite ion exchanger of silica matrix  
impregnated with ammonium molybophosphate for cesium  
uptake from aqueous solution**
