Efficacy of carbon nanotube positioning in the polyethersulfone support layer on the performance of thin-film composite membrane for desalination

Moon Son, Hyeon-gyu Choi, Lei Liu, Evrim Celik, Hosik Park, Heechul Choi

PII: S1385-8947(15)00006-6
DOI: <http://dx.doi.org/10.1016/j.cej.2014.12.108>
Reference: CEJ 13111

To appear in: *Chemical Engineering Journal*

Received Date: 18 November 2014
Revised Date: 18 December 2014
Accepted Date: 30 December 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Efficacy of carbon nanotube positioning in the polyethersulfone support layer on the performance of thin-film composite membrane for desalination
