The role of Born energy in electrohydrodynamic characteristics of soft nanofluidics: Inclusion of EDL overlap and steric effects

Milad Reshadi, Mohammad Hassan Saidi

PII: S0009-2509(18)30346-4
DOI: <https://doi.org/10.1016/j.ces.2018.05.049>
Reference: CES 14258

To appear in: *Chemical Engineering Science*

Received Date: 16 October 2017
Revised Date: 25 April 2018
Accepted Date: 25 May 2018

Please cite this article as: M. Reshadi, M. Hassan Saidi, The role of Born energy in electrohydrodynamic characteristics of soft nanofluidics: Inclusion of EDL overlap and steric effects, *Chemical Engineering Science* (2018), doi: <https://doi.org/10.1016/j.ces.2018.05.049>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The role of Born energy in electrohydrodynamic characteristics of soft nanofluidics: inclusion of EDL overlap and steric effects
