The non-catalytic partial oxidation of methane in a flow tube reactor using indirect induction heating – an experimental and kinetic modelling study

Chao'en Li, Benny Kuan, Woo Jin Lee, Nick Burke, Jim Patel

PII: S0009-2509(18)30284-7
DOI: <https://doi.org/10.1016/j.ces.2018.04.070>
Reference: CES 14202

To appear in: *Chemical Engineering Science*

Received Date: 15 December 2017
Revised Date: 13 April 2018
Accepted Date: 28 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The non-catalytic partial oxidation of methane in a flow tube reactor using indirect induction heating – an experimental and kinetic modelling study
