Assessment of $k - \epsilon$ models using tetrahedral grids to describe the turbulent flow field of a PBT impeller and validation through the PIV technique

Víctor X. Mendoza-Escamilla, Alejandro Alonzo-Garcia, Helvio R. Mollinedo, Israel Gonzalez-Neria, J. Antonio Yáñez-Varela, Sergio A. Martinez-Delgadillo

PII: S1004-9541(17)31536-7
DOI: doi:[10.1016/j.cjche.2018.02.012](https://doi.org/10.1016/j.cjche.2018.02.012)
Reference: CJCHE 1052

To appear in:

Received date: 9 November 2017
Revised date: 11 January 2018
Accepted date: 12 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
