Multi-objective Optimization of an Integrated Gasification Combined Cycle for Hydrogen and Electricity Production

Maan Al-Zareer , Ibrahim Dincer , Marc A. Rosen

PII: S0098-1354(18)30597-0
DOI: [10.1016/j.compchemeng.2018.06.004](https://doi.org/10.1016/j.compchemeng.2018.06.004)
Reference: CACE 6130

To appear in: *Computers and Chemical Engineering*

Received date: 20 November 2017
Revised date: 26 May 2018
Accepted date: 9 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Hydrogen production based IGCC system is modeled, simulated and optimized
- The optimization considers energy and exergy efficiencies and hydrogen cost
- Various coals with different grades are considered as feed to the gasifier
