This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An optimization approach for municipal solid waste planning is presented.
- A new approach for accounting the financial risk is proposed.
- The proposed approach considers the involved stakeholders.
- Economic and environmental objectives are considered.
- A case study from Mexico is presented.
