

## Accepted Manuscript

Iterative peptide synthesis in membrane cascades: untangling operational decisions

Wenqian Chen , Mahdi Sharifzadeh , Nilay Shah ,  
Andrew G. Livingston

PII: S0098-1354(18)30351-X  
DOI: [10.1016/j.compchemeng.2018.04.024](https://doi.org/10.1016/j.compchemeng.2018.04.024)  
Reference: CACE 6092

To appear in: *Computers and Chemical Engineering*

Received date: 10 December 2017  
Revised date: 15 April 2018  
Accepted date: 19 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Dynamic process model of semi-batch peptide synthesis in membrane cascade was developed
- Model validation by experimental data
- Reactions, side-reactions and diafiltration included in the process model
- Further study by readers is enabled by the downloadable simulation file (gPROMS)
