This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Highlights

- Multiproduct pipeline system integrated with refinery and distribution center operations.
- Tanks management, pipeline scheduling, time synchronization and operational performance.
- Solution Procedure based on feasible space reduction with improvements on computational performance.
- Handling of interfaces and explicit management of pumping interruption.
