Efficient sampling algorithm for large-scale optimization under uncertainty problems

Nishant Dige , Urmila Diwekar

PII: S0098-1354(18)30437-X
DOI: [10.1016/j.compchemeng.2018.05.007](https://doi.org/10.1016/j.compchemeng.2018.05.007)
Reference: CACE 6106

To appear in: *Computers and Chemical Engineering*

Received date: 3 August 2017
Revised date: 13 April 2018
Accepted date: 7 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Novel sampling technique for large scale modeling and optimization problems.
- Analysis of six sampling techniques
- Large scale experiments to analyze the techniques.
- Application to a large scale stochastic programming problem.
