Title: Nonsmooth Differential-Algebraic Equations in Chemical Engineering

Author: Peter Stechlinski Michael Patrascu Paul I. Barton

PII: S0098-1354(17)30386-1
DOI: <https://doi.org/doi:10.1016/j.compchemeng.2017.10.031>
Reference: CACE 5937

To appear in: *Computers and Chemical Engineering*

Received date: 1-6-2017
Revised date: 23-10-2017
Accepted date: 26-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nonsmooth Differential-Algebraic Equations in Chemical Engineering

Highlights:

- Advocates nonsmooth modeling paradigm for simulation and optimization of process operations.
- Highlights challenges faced by prevalent modeling frameworks in process systems engineering.
- Several examples of process operations modeled as nonsmooth DAEs are illustrated.
- Presents the relevant mathematical theory for nonsmooth DAEs.
