Satisfiability Modulo Theories for Process Systems Engineering

Miten Mistry, Andrea Callia D'Iddio, Michael Huth, Ruth Misener

PII: S0098-1354(18)30130-3
DOI: [10.1016/j.compchemeng.2018.03.004](https://doi.org/10.1016/j.compchemeng.2018.03.004)
Reference: CACE 6043

To appear in: *Computers and Chemical Engineering*

Received date: 14 June 2017
Revised date: 20 December 2017
Accepted date: 5 March 2018

Please cite this article as: Miten Mistry, Andrea Callia D'Iddio, Michael Huth, Ruth Misener, Satisfiability Modulo Theories for Process Systems Engineering, *Computers and Chemical Engineering* (2018), doi: [10.1016/j.compchemeng.2018.03.004](https://doi.org/10.1016/j.compchemeng.2018.03.004)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose applying satisfiability modulo theories to process systems engineering
- We show how the complementary strengths of SMT and MINLP fit together
- We consider applications in bin packing, model explainers, and MINLP solving
