Life Cycle Aggregated Sustainability Index for the Prioritization of Industrial Systems Under Data Uncertainties

Jingzheng Ren

PII: S0098-1354(18)30189-3
DOI: [10.1016/j.compchemeng.2018.03.015](https://doi.org/10.1016/j.compchemeng.2018.03.015)
Reference: CACE 6054

To appear in: *Computers and Chemical Engineering*

Received date: 16 November 2017
Revised date: 4 February 2018
Accepted date: 17 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Life cycle sustainability index under uncertainties was developed.
- Data uncertainties were incorporated in this sustainability ranking method.
- Ambiguity and vagueness in human's judgments can be addressed.
- Sustainability ranking of industrial systems under uncertainties can be achieved.
