A Survey of Optimal Process Design Capabilities and Practices in the Chemical and Petrochemical Industries

Calvin Tsay, Richard C. Pattison, Michael R. Piana, Michael Baldea

PII: S0098-1354(18)30023-1
DOI: [10.1016/j.compchemeng.2018.01.012](https://doi.org/10.1016/j.compchemeng.2018.01.012)
Reference: CACE 6001

To appear in: *Computers and Chemical Engineering*

Received date: 8 November 2017
Revised date: 16 January 2018
Accepted date: 18 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A survey of optimal process design practices and tools
- Focus on design of continuous processes in a wide spectrum of industries
- Interactions between technology development, plant construction and process operations are revealed
- Trends and future recommendations for adoption of optimal design tools are provided
