Synthesis and biological imaging of fluorescent polymeric nanoparticles with AIE feature via the combination of RAFT polymerization and post-polymerization modification

Yanzhu Liu, Liucheng Mao, Saijiao Yang, Meiyong Liu, Hongye Huang, Yuanqing Wen, Fengjie Deng, Yongxiu Li, Xiaoyong Zhang, Yen Wei

PII: S0143-7208(17)32404-X

DOI: [10.1016/j.dyepig.2018.05.032](https://doi.org/10.1016/j.dyepig.2018.05.032)

Reference: DYPI 6761

To appear in: *Dyes and Pigments*

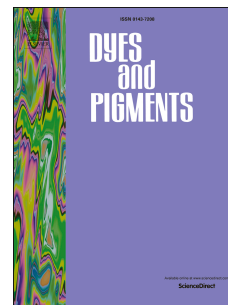

Received Date: 21 November 2017

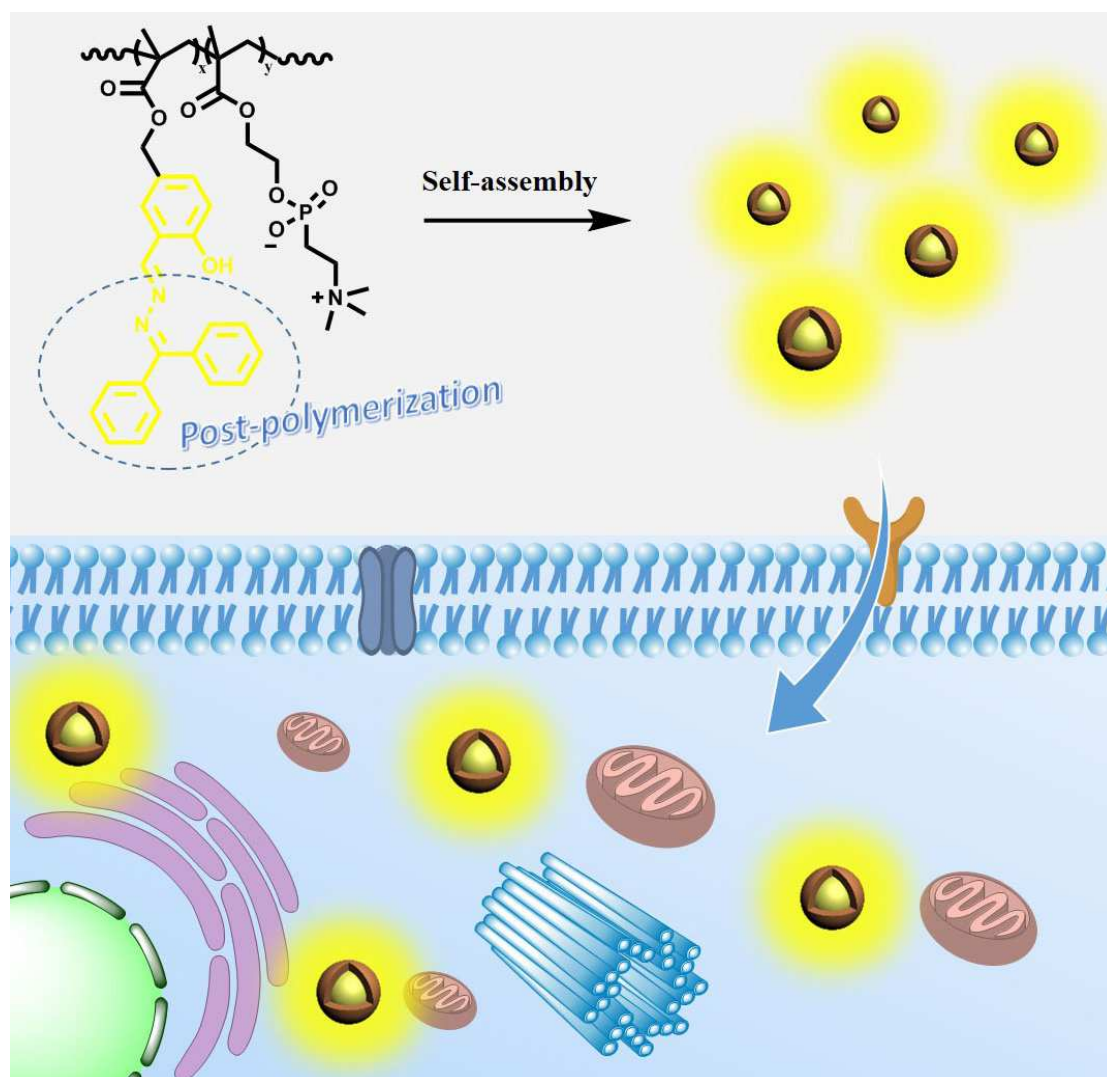

Revised Date: 15 May 2018

Accepted Date: 15 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A novel strategy based on the combination of RAFT polymerization and post-polymerization has been developed for the synthesis of fluorescent polymeric nanoparticles with ESIPt feature
