

# Accepted Manuscript

Ethylene glycol assisted rapid preparation of NaEuF<sub>4</sub> nanorods with splendid thermal stability for indoor illumination and optical displays

Peng Du, Xiaoyong Huang, Jae Su Yu

PII: S0143-7208(18)30222-5

DOI: [10.1016/j.dyepig.2018.02.024](https://doi.org/10.1016/j.dyepig.2018.02.024)

Reference: DYPI 6556

To appear in: *Dyes and Pigments*

Received Date: 30 January 2018

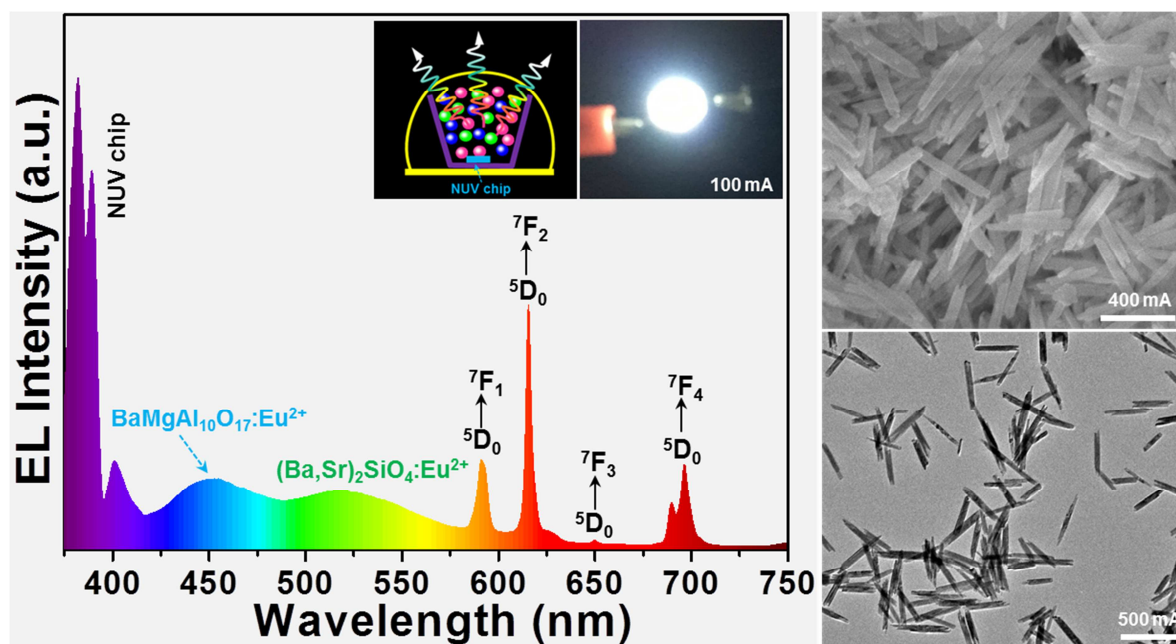

Revised Date: 13 February 2018

Accepted Date: 15 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Graphical abstract

Facile synthesis of uniform  $\text{NaEuF}_4$  red-emitting nanorods at room temperature for white light-emitting diodes and optical displays.
